

Previously Owned Equipment Data Sheet

Ozocan Corporation have supplied ozone generating equipment and accessories, worldwide, since 1954. Many of the facilities have successful operating histories in excess of 35 years. From time to time, previously owned equipment becomes available and we offer it for resale to new clients, who may be looking for an economical option to obtain ozone generating equipment. The equipment is sold with a certification of ozone production and a guarantee for a period of one year from date of delivery.

OzoNova VL 431

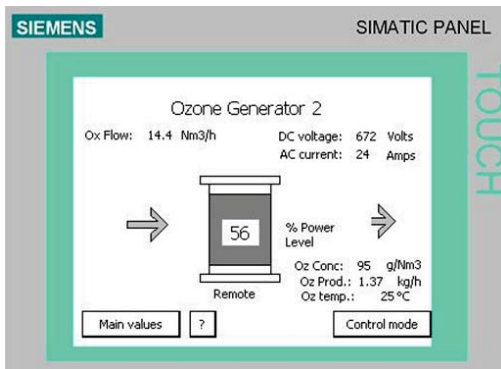

210 ppd (96 kg/day, 4 kg/hr @ 10% in oxygen)

Ozocan Reference UE 11-002

This is a unique opportunity to acquire a power efficient, high capacity, ozone generator, loaded with features. The unit will be sold with a one year, full manufacturer's warranty. Delivery can occur within three weeks of receipt of order.

An exceptional opportunity. Two units are available.

These units were sold to a Canadian municipal potable water plant in 2009. The units were operated for a period of 1 year. During that period, the equipment was maintained and is in excellent condition. These are factory new ozone generators, loaded with many features, including completely automatic control, and remote access assistance via the internet.

- Additional components, such as compressors, oxygen generators, mixing components, off gas destructors and other accessories are available from Ozocan.
- The units will produce 4.0 kg/h @ 10 wt% in 94% purity oxygen at very competitive specific power consumption levels.
- The equipment has automation components which allow for ozone production control from 10 to 100% capacity.
- Ozocan Corporation maintains a complete set of parts and can offer service for this equipment as required.
- A complete Operations and Maintenance Manual (in French and English) along with shop certification test results will be provided with the ozone generator.
- Delivery can occur within three weeks after receipt of an order.
- We offer the services of our experienced site technical staff to assist in start up.

If you have interest in obtaining more information with respect to this equipment, please contact Ronald Larocque (ronaldl@ozocan.com) or call our office number found below.
